

## ECCO Arena

## Specification

The Ecco Arena motorized double portal turnstile with stainless steel drum and barrier grate and galvanized guides and feet is especially well suited for stadiums, high-traffic recreation facilities and also for outdoor building access control. The front panels can accommodate card readers. The Ecco Arena is suitable for single or bidirectional operation and its 90° division means very good traffic separation.

## Technical Characteristics:

Power Supply: 230 V AC 50-60 Hz

Power Consumption: 50 VA max.

Operating Temperature: -25°C to +40°C

Outer/Inner Width: 2.106 mm / 550 mm

Length: 1.750 mm

Outer/Inner Height: 2.252 mm / 2.050 mm

Weight: 230 kg

Reader Interface: Floating Contacts

Material: CrNi-Steel Type 1.4301

Aluminium, powder-coated Hot-galvanized Steel
