

## TCS TRINITY

The motorized turnstile TRINITY in 3- and 2-arm technology (suitable for escape routes) is entirely made of stainless steel. The payment machine includes a coin return unit and ticket printer and is especially suitable for public showers, restrooms, washrooms and amusement parks. The integrated counter offers an exact overview of customer frequency and payments. The coin box is secured by a special safety lock, thus its exchange can be handled by a regular employee.

## Description

### Technical specifications

Power supply 24 V =  
Power consumption 50 Wh  
Storage temperature: -40°C to +50°C  
Operating temperature: -10°C to +50°C  
Width/free width: 900mm / 570mm  
Length: 1.000mm  
Height: 1.647mm  
Set-up area: 900mm x 1.000mm  
Mass: 50kg  
Material: Stainless steel grade 1.4301 = V2A  
Communication: potential free contacts

### Characteristics:

- Maintenance free mechanics with integrated LOGITURN® control for minimal power consumption
- Large graphic display
- Life-time quality
- Traffic counter
- Display of available coins for change

### Area of application:

- Public restrooms and washrooms
- Recreation facilities
- Amusement parks
- Admission payments
- Attractions
- Indoor and outdoor use
